

Westmount Health Facility Purpose and Mission

Our dedicated team of professionals strive on a daily basis to work as a team, in conjunction with the resident's family to develop an individualized plan of care that enable the resident to maximize their level of functioning. We assist and encourage our residents to engage in the many daily activities we offer and welcome family involvement and participation.

Westmount is staffed by highly skilled professionals including physicians, licensed nurses, physical, occupational and speech therapists, social worker, dietary and activity specialists.

All rooms have scenic views of the mountains to provide a homelike environment to aid in our residents' comfort and recuperation.

Westmount Health Facility

The Westmount Health Facility is an eighty bed skilled nursing facility located at 42 Gurney Lane. Westmount provides a wide spectrum of nursing care to the residents of Warren County. We provide short-term rehabilitation

services to people who cannot immediately return to their homes because of an accident or illness. We also provide long-term care for individuals

who are unable to care for themselves. We look at each person from an individual perspective. We then utilize a team approach working with the residents and their family to develop a unique plan of care to meet their needs.

In addition to our caring staff of professionals we also offer physical, occupational and speech therapy. Our therapy programs are individually designed to maximize the person's restorative potential as quickly as possible.

The staff at Westmount takes pride in providing our residents the best quality of care possible. We are committed to making a difference in people's lives by providing a safe, supportive environment for you and your loved ones. We invite you to come and visit our facility to see for yourself.
